

## Da Rulez

Your goal is to drain your opponent's life force by hitting the humor balls into the holes.

Humor balls are allowed to collide with each other if their colors are glowing on the center sigil. For example, if black and red are lit up, then black balls and red balls are allowed to collide without any consequences.

However, if the humors' colors are not glowing, the humor balls will combine into a DEATH BALL. Death balls are allowed to collide with any other balls, but beware! If you hit a death ball into the hole, your opponent automatically wins.
